Professional Experience

Overview

I possess professional experience developing web applications and hybrid, cross-platform mobile applications utilizing a wide array of technologies. I specialize in JavaScript and TypeScript, yet I am talented with a multitude of languages, frameworks, libraries, and other tools.

January 2022 – April 2022
Frontend Engineer • **Full Time, Remote • Tombras**

I collaborated with the "DevSouth" .NET team and worked on websites for a Fortune 500 company, specifically Daimler. I was tasked with updating and modifying websites for Freightliner and Western Star. I worked with Umbraco, CSS, Tailwind CSS, JavaScript, and of course, Git and Bitbucket.

March 2021 – January 2022
Web Application Developer • Full Time • Solution Consulting Group

I was solely responsible for developing the user interface for a collectable card grading software. With this solution, graders can drag lines to calculate centering scores and provide grades for corners, edges, and surfaces for both the front and back of the card. In addition, I completed small tasks, for example, developing email templates. Common technologies included HTML, CSS, JavaScript, TypeScript, Git, GitHub, Bootstrap, and some jQuery and Symfony (PHP). Object-Oriented programming practices were often used.

January 2021–March 2021
Web Developer • Temporary Contract, Remote • Pass It Down, Inc.

This was a contract role. I worked alongside a good friend, colleague, and mentor developing a SaaS platform for creating digital

storyboards, ones often found in museums, for example. Common technologies used were JavaScript (React library) and CSS.

June 2020–January 2021
Junior Developer • Full Time • Bluestone Apps, LLC

As my first developer role, I was tasked with coordinating development projects with overseas developers in addition to working on hybrid, cross-platform mobile applications using Angular in conjunction with Ionic Framework and Cordova. Two major projects I worked on were Check Runner and Home Birds. You can find the Check Runner app in the Google Play Store and iOS App Store.

Education

Hardin Valley Academy, Knoxville, TN
Graduated 2013, High School Diploma

Skills and Technologies (At a Glance)

- HTML
- CSS
- SCSS/Sass
- JavaScript (ES6+)
- TypeScript
- Stencil + Web Components

- VueJS (2.x/3.x)
- Angular
- Ionic
- SQL
- Postgres
- Relational Databases

- Git + Github
- DOM
- NodeJS
- Express
- PHP
- MySQL
